

1. Submit the GitHub URL for all three pages from this lab plus the URL for the CSS file.
 - a. Wireframe URL
 - i. <https://caileighgg.github.io/ist263/lab06/wireframe.png>
 - b. Contact.html & style sheet.css
 - i. <https://caileighgg.github.io/ist263/lab06/contact.html>
 - ii. <https://caileighgg.github.io/ist263/lab06/contactstyles.css>
 - c. Skills.html & style sheet.css
 - i. <https://caileighgg.github.io/ist263/lab06/skills.html>
 - ii. <https://caileighgg.github.io/ist263/lab06/skillstyles.css>
2. In your book on pages 301-302 are a list of font and text properties. Pick a property off this list that we did not use in either the lecture or lab. Explain how you could see this property being applied to something on either the bio, skills or contact pages to make the design better.
 - a. I pick "font.expansion" off the list in the textbook of font and text properties. This could be applied to any of my pages especially in the headers or anything that deems important. When you expand or contract a line of text it gives off a tense or more relaxed feeling. I could use it for headers if I wanted attention brought to them. You use 0 if you want the text to be normal and continue to go higher so 1 is slightly more expanded etc.
3. Hand it the peer copy document review with answers to these questions. Note that I have read all the copy documents, and everyone has something to improve. **Don't say everything is great.**
 - a. Who's copy document did you review?
 - i. Connor Durkin
 - b. What typos are in your partner's copy document?
 - i. I commented on several typos within the document that he shared with me. Some examples were not finishing sentences at the end of the dogs descriptions. Others were grammatical errors that I suggested/fixed.
 - c. What didn't they communicate clearly? Give me details here?
 - i. I think he communicated which dogs are good for a family and which aren't and if they weren't, very clearly. He provided a lot of detail for each dog breed, for example when describing the rottweiler breed he went into extensive detail about the size, and descriptions about them also what they are good at and that they tend to not be great family dogs.
 - d. Did the copy seem like it was too much/not enough? Explain.

- i. It did seem like a lot of information, but he says he plans on cutting it down. I suggested he add some hierarchy in the details he is providing within the dog breed descriptions because viewers won't want to read so many paragraphs. I liked how he added somewhere for the viewers to go after the information he provided on his website, on page 3, all the resources he provides are great.
- e. Where could your partner use headings, bullet points, etc. to make the copy stand out more to users?
 - i. He could use headings, bullet points and sub-bullet points to distinguish the important details within each description of dog breed. The paragraphs felt lengthy from description to description. He could organize it the same throughout each dog breed so there is consistency for the viewer.
- f. Any other comments?
 - i. There is a lot of information about the dogs which is great. Just more organization will be better and correcting the typos.
